

## Certifications DIN Cold Rolled Stainless Steel Pipe for Seamless and Durable Product

### Our Product Introduction

for more products please visit us on [flangespipefittings.com](http://flangespipefittings.com)

#### Basic Information

- Place of Origin: CHINA
- Brand Name: KASUGAI
- Minimum Order Quantity: depends on location.
- Payment Terms: T/T100%ADVANCE

#### Product Specification

- Processing Technology: Cold Drawn/Cold Rolled/Hot Rolled/Forged
- Other Grade: 316L 310S 321 347 2205 904L 2507.etc
- Usage: Construction Structure
- Technology: Cold And Hot Rolled
- Feature: Enhanced Corrosion Resistance:
- Diameter: DDN5-DN600
- Tolerance:  $\pm 0.02\text{mm}$
- Business Type: Manufacturer

## Product Description

### Product Description:

Our Seamless Stainless Steel Pipe is a top-quality product designed for industrial applications. Made from austenitic stainless steel, this cold rolled stainless steel pipe offers exceptional durability and corrosion resistance, making it ideal for a wide range of industrial uses. The Seamless Stainless Steel Pipe comes with a strict tolerance of  $\pm 0.02\text{mm}$ , ensuring precise and consistent performance in various industrial processes. It is available in a wide range of diameters, from DDN5 to DN600, catering to different project requirements. When it comes to price terms, our Seamless Stainless Steel Pipe can be purchased under CIF, CFR, FOB, or EX-WORK terms, providing flexibility for customers in different regions. In addition to its standard grade, our Seamless Stainless Steel Pipe is also available in other grades such as 316L, 310S, 321, 347, 2205, 904L, 2507, and more. These additional grades offer enhanced properties to meet specific industrial needs. Whether you are looking for a reliable piping solution for chemical processing, oil and gas, or other industrial applications, our Seamless Stainless Steel Pipe is a trusted choice. Its high-quality construction and precise specifications make it a preferred option for demanding industrial environments.

### Features:

Product Name: Seamless Stainless Steel Pipe  
 Processing Technology: Cold Drawn/Cold Rolled/Hot Rolled/Forged  
 Technique: Cold Drawn/Hot Rolled  
 Certifications: ASTM, ASME, DIN, EN, JIS  
 Technology: Cold And Hot Rolled  
 Payment Term: 30%T/T Advance + 70% Balance

### Applications:

The KASUGAI Seamless Stainless Steel Pipe, originating from China, is a top-quality product that meets various certifications such as ASTM, ASME, DIN, EN, and JIS. With a diameter range of DDN5-DN600 and a thickness range of 1-8mm, this Cold Drawn Seamless Steel Pipe is perfect for industrial applications.

One of the key product attributes of the KASUGAI Seamless Stainless Steel Pipe is its versatility in different industrial scenarios. This product is well-suited for use in industries such as petrochemical, chemical, pharmaceutical, food processing, automotive, and construction.

Due to its high-quality manufacturing process and adherence to stringent standards, this Cold Drawn Seamless Steel Pipe is ideal for applications that require durability, corrosion resistance, and high strength. Its seamless design ensures a reliable performance in demanding industrial environments.

Whether it's for transporting fluids, gases, or structural applications, the KASUGAI Seamless Stainless Steel Pipe offers a reliable solution. Its precise dimensions and consistent quality make it a preferred choice for various industrial processes.

When it comes to payment terms, KASUGAI offers a convenient option of 30% T/T advance payment with the remaining 70% balance, making it easier for industrial buyers to procure this high-quality product.

### Support and Services:

Our Product Technical Support and Services for Seamless Stainless Steel Pipe include:

- Detailed product specifications and information
- Assistance with product selection and sizing
- Troubleshooting and problem-solving support
- Installation guidance and recommendations
- Maintenance tips and best practices
- Product warranty information
- Access to technical resources and documentation
