

ASTM A269 TP 316L Seamless Stainless Steel Tube – NACE Compliant

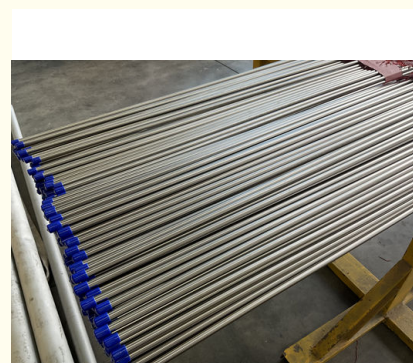

Our Product Introduction

Basic Information

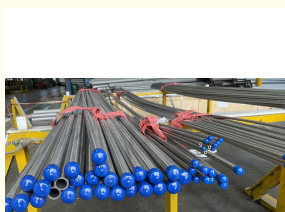

- Place of Origin: CHINA
- Brand Name: KASUGAI
- Model Number: ASTM A269 TP 316L
- Minimum Order Quantity: depends on location.
- Payment Terms: T/T100%ADVANCE

Product Description

Our **ASTM A269 TP 316L seamless stainless steel tubes** are manufactured to the highest standards, ensuring excellent corrosion resistance, mechanical strength, and long-term performance in demanding environments. This grade, 316L, is a low-carbon version of 316 stainless steel, offering superior resistance to intergranular corrosion after welding or stress relieving. What sets our tubing apart is its compliance with **NACE (National Association of Corrosion Engineers) requirements** making it suitable for use in **sour service environments** where hydrogen sulfide (H₂S) is present. This includes applications in oil and gas, chemical processing, and offshore platforms.

Key Features:**Standard:** ASTM A269**Material Grade:** TP 316L (UNS S31603)**Process:** Seamless (SMLS)**Corrosion Resistance:** Excellent in chloride-rich and acidic environments**NACE Compliance:** Meets NACE MR0175/ISO 15156 for sour service**Finish:** Bright annealed or custom per project needs**Testing:** Hydrostatic test, eddy current test, PMI, and NACE testing included**Applications:**

Oil & Gas pipelines

Offshore equipment

Chemical injection lines

Instrumentation and control systems

Heat exchangers and condensers

We guarantee material traceability and provide full documentation including **MTC (EN 10204 3.1/3.2)**, **NACE test reports**, and other quality assurance records.**Kasugai Shanghai Co., Ltd.**
